

# *Welcome to the NNSP/SwedNess Intro Course in Neutron Scattering*

## Why Give this Course?

- Neutron scattering is an optimal and very versatile technique to study materials, devices and objects.
- Neutrons are unique in several aspects and are able to directly probe some things other techniques can not.
- Neutron scattering techniques cover a very broad scientific scope.

## Why Give this Course?

- Neutron scattering is an optimal and very versatile technique to study materials, devices and objects.
- Neutrons are unique in several aspects and are able to directly probe some things other techniques can not.
- Neutron scattering techniques cover a very broad scientific scope.

Sat 30 Oct	Free Weekend				
Sun 31 Oct	Free Weekend				

## Week 3

Time / Date	Morning Session I 08:30 – 10:00	Morning Session II 10:30 – 12:00	12:00 - 14:00	Afternoon Session I 14:00 – 15:30	Afternoon Session I 16:00 – 17:30
Mon 1 Nov	<p><b>L15 “INS III: Magnetic”</b></p> <ul style="list-style-type: none"> <li>Spin waves</li> <li>Magnetic Cross Section</li> <li>Applications</li> </ul> <p><b>Kim Lefmann, NBI</b></p>	<p><b>Ex. 11 Spin-waves</b></p> <ul style="list-style-type: none"> <li>Pen-and-paper problem</li> </ul> <p><b>Kim Lefmann, NBI</b></p>	Lunch	<p><b>Ex. 12: TUTORIAL - SpinW/OMDB</b></p> <ul style="list-style-type: none"> <li>Modelling phonons/spin waves</li> <li>Extract J's</li> <li>Spin-W</li> </ul> <p><b>Simon Ward, ESS/DMSC</b> <b>Johan Hellsvik, KTH</b></p>	<p><b>Ex. 13: TUTORIAL - SpinW/OMDB</b></p> <ul style="list-style-type: none"> <li>Modelling phonons/spin waves</li> <li>Extract J's</li> <li>Spin-W</li> </ul> <p><b>Simon Ward, ESS/DMSC</b> <b>Johan Hellsvik, KTH</b></p>
Tue 2 Nov	<i>Help Session for Proposal Writing</i>	<i>Help Session for Proposal Writing</i>	Lunch	<p><b>L16 “QENS”</b></p> <ul style="list-style-type: none"> <li>Instrumentation</li> <li>Energy-/timescales</li> <li>Coherent / Incoherent</li> <li>Diffusion, Molecular dynamics</li> <li>Cross section &amp; Isotope labeling</li> </ul> <p><b>Aleksandar Matic, Chalmers</b></p>	
Wed 3 Nov	<p><b>L17 “Polarized Neutron Scattering”</b></p> <ul style="list-style-type: none"> <li>Polarizing/Flipping/Detecting the neutron spin (theory &amp; technologies)</li> <li>Basic theory</li> <li>Examples (Elastic &amp; Inelastic)</li> </ul> <p><b>Werner Schweika, ESS</b></p>		Lunch	<p><b>L18 Keynote Lecture</b> <i>Societal Challenges</i> <b>“Sustainable Energy”</b> <b>Martin Månsson, KTH</b></p>	
Thu 4 Nov	<p><b>L19 Keynote Lecture</b> <i>Societal Challenges</i> <b>“Quantum Materials”</b> <b>Henrik Rønnow, EPFL</b></p>		Lunch	<p><b>L20 Keynote Lecture</b> <i>Societal Challenges</i> <b>“Engineering Materials/Processes”</b> <b>Richard Moat, OU</b></p>	<i>Help Session for Proposal Writing</i>
Fri 5 Nov	<p><b>L21 Keynote Lecture</b> <i>Societal Challenges</i> <b>“Life-Science”</b> <b>Jeremy Lakey, Newcastle University</b></p>		Lunch	<p><b>L22 Keynote Lecture</b> <i>“Future Science at ESS”</i> <b>Andreas Schreyer, ESS</b> <b>Time: 15:00 – 16:30</b></p>	<p><b>Closing Words</b> <b>K. Lefmann, NBI</b> <b>M. Månsson, KTH</b></p>
Sat 6 Nov	END OF SCHOOL				
Sun 7 Nov	END OF SCHOOL				

# Your Teachers

**NNSP**

# *Swedish National Graduate School in Neutron Scattering*

---

---

Swedish Neutron Education for Science & Society

---

# What is SwedNess?

- Swedish national graduate school in neutron scattering that started officially in September 2016
- Collaboration between six Swedish universities with management at Uppsala University:

**CHALMERS**

**LUND**  
UNIVERSITY

**Stockholm**  
University

**li.u** LINKÖPING  
UNIVERSITY

UPPSALA  
UNIVERSITET

- Fully funded by the Swedish Foundation for Strategic Research (SSF), which main goal is to strengthen Sweden's future competitiveness in science, engineering and medicine.

- Total budget of 220 MSEK (~21 M€) running until 2026

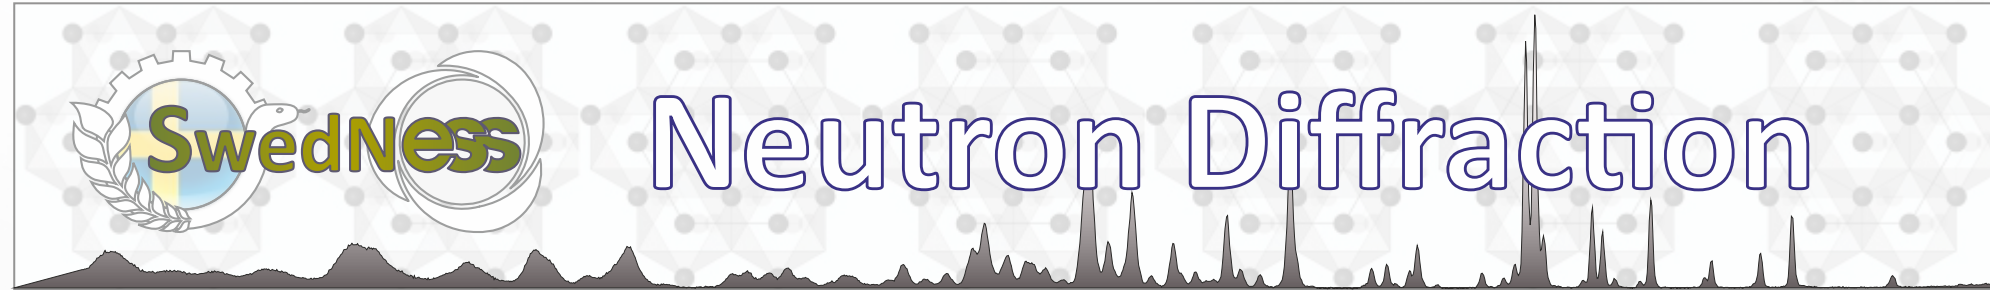

SWEDISH FOUNDATION *for*  
STRATEGIC RESEARCH

- This allow us to fully fund course program as well as 40 PhD students with a individual budget of 4.5 MSEK each (salary + 200 kSEK/year in running budget per student)

- Theoretical part (lectures/exercises) is given together with the Nordic Neutron Science Program (NNSP) - Kim Lefmann.
- 2 weeks (4 ECTS) concentrated "late summer" school in Tartu, Estonia
- Next Time: September 2022 (TBC)
- Funding for travel/hotel is available and the course is **OPEN FOR EVERYONE !!!**
- Fourth time we give this course
- So far ~150 students participated in this course (SE, DK, NO, Baltic states)

# Specialized Neutron Courses - Techniques

**SwedNess** Neutron Diffraction

7.5 ECTS  
Stockholm University

**SwedNess** Neutron Reflectivity & GISANS

4 ECTS  
Uppsala University

**SwedNess** Small-Angle Neutron Scattering (SANS)

3 ECTS  
Lund University

**SwedNess** Neutron Imaging

3 ECTS  
Lund University

**SwedNess** Neutron Spectroscopy

5 ECTS  
Chalmers  
ISIS

## Specialized Neutron Courses - Topics

Neutrons for the study of  
electrochemical processes

5 ECTS

KTH

Uppsala University

Engineering Materials  
Science using Neutrons

5 ECTS

Linköping University,  
Chalmers + KTH

Neutrons for Life Science

5 ECTS

Linköping University

Neutrons & Muons  
for Magnetism

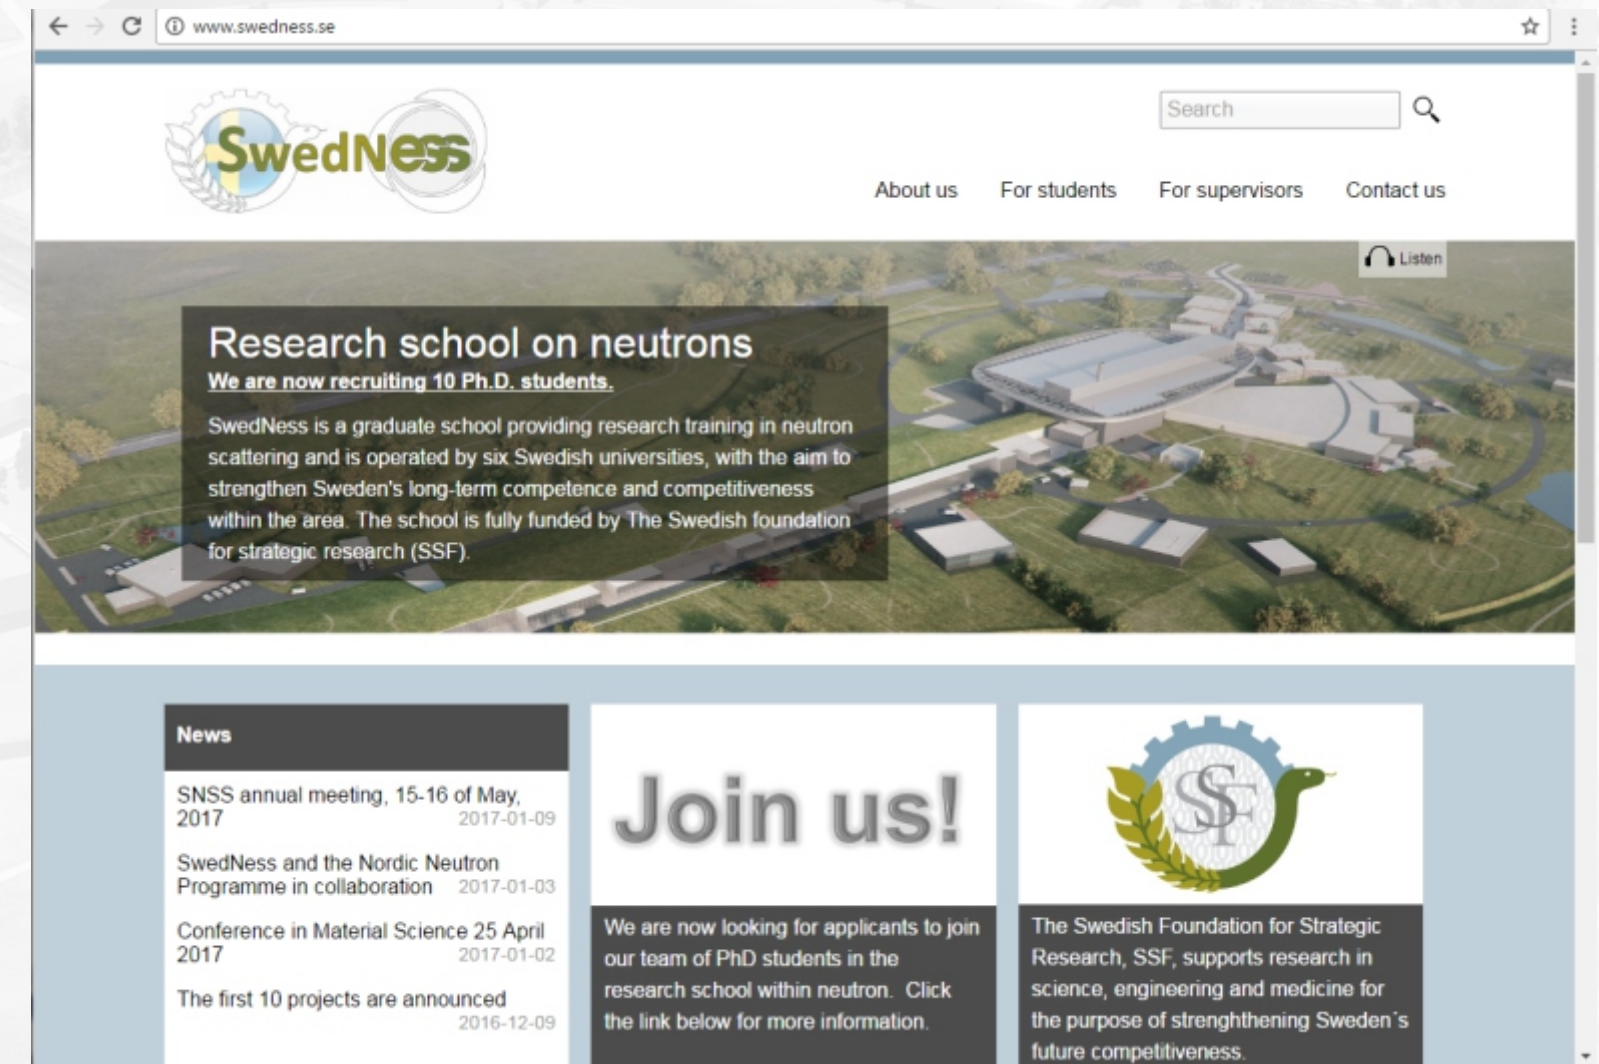

5 ECTS

KTH Royal Inst. Technology  
NORDITA

# The SwedNess Course Catalogue

- **ALL courses, intro as well as specialized courses are aimed to be given annually!**
- **ALL courses are OPEN to EVERYONE (Universities outside SwedNess, industry...)**
- **ALL courses are FREE (except potential travel and accommodation in specialized courses)  
(Covid-19 = online courses in progress)**
- **Joint effort together with NNSP and [e-neutrons.org](http://e-neutrons.org)**
- **Information is available at [www.SwedNess.se](http://www.SwedNess.se)**
- **So far we had close to 500 registered participants in our courses.**

- **SwedNess is also participating in & contributing to several other educational programs/efforts, e.g. RACIRI, MIRAI, etc.**

- Idea for how neutrons can help your research (specific question = piece of the puzzle)
- Talk to an expert (this will soon be You !!!)
- Consider your sample!!! (available size/mass, crystal/powder/thin film).
- Think about if you sample contains elements with low scattering or high absorption  
<http://www.ncnr.nist.gov/resources/n-lengths/>
- Select appropriate source & instrument for your experiment (**check deadlines + shutdowns!**)
- Contact instrument responsible to discuss experiment (**> 1 week before you submit proposal!**)
- Write a proposal and apply for beamtime at your selected neutron source/instrument
- Cross your fingers and wait for the review committee + in some cases "national quota"
- If you obtain beamtime start to prepare your experiments well advance (align crystals, manufacture sample holders etc.)
- If you plan to do experiments at different sources with same samples: consider activation of your samples (active sample transport is complicated and expensive!)
- Check necessary paperwork (**visa!**) at source and perform the mandatory "safety training"

- Depending on your nationality you might need a visa to visit some of the neutron sources around the world.
- Take this seriously and apply in time !!! Invitation letter from source (talk to respective user office) + letter from head of department. We could possibly also write something from SwedNess / NNSP...
- Always make sure you do the safety training before going to beamtime and follow the rules when you are there! This is your health we are talking about and... radiation safety officers do not usually have a sense of humor!!!
- Talk to your respective university about getting a “dose pass” to keep track of your total radiation dose during all of your experiments.
- Nowadays: check also the rules for vaccine-pass etc.

Remember to apply for beamtime NOW !!!

**NIST**

**ISIS  
Science & Technology  
Facilities Council**

PAUL SCHERRER INSTITUT

NEUTRONS  
FOR SCIENCE

**OAK RIDGE  
National Laboratory**

- Lectures: conducted “live via zoom” except Kim’s afternoon lecture on 21 October (recording). We will record some lectures and make videos available (not all!). For lectures we wish to have questions via the zoom chat in order to keep a good flow and also to make video editing (for recorded lectures) easier. But do not hesitate to ask questions!!! Slides from the lectures will be made available.
- e-learning Exercises are conducted “on your own time” but during the dedicated sessions (in program) there will be online assistance via zoom (same link) available. **Note the web-links in the program!**

- Web links: we have two parallel websites with the course material/info:

<https://indico.nbi.ku.dk/event/1670/>

<https://www.neutrons.se/Tartu2021/>

- Alumni Lectures from “old Tartu 2017 students” will be made available during these weeks as videos. Will both describe their projects and as well as give some “tips-and-tricks” for your conducting a PhD using neutrons. We advice to watch these towards the end of the school (or after).
- We have two more extensive Tutorials (Rietveld/Fullprof + SpinW/OMDB) that requires some preparations in the form of software installations. See the following slides...

# Diffraction / Fullprof & Vesta (26 October)

Please install the following (3) things during first week of the school:

1.

Download / Install the Fullprof suite + Exercises-dat (tutorials)

<https://www.ill.eu/sites/fullprof/php/downloads.html>

The screenshot shows the FullProf Suite website interface. At the top left is a Google search bar with 'Fullprof' entered. Below it is the 'FullProf Suite Homepage' with the URL <https://www.ill.eu/sites/fullprof/> and a description of the suite. A red arrow points from the 'Downloads' link in the navigation menu to a detailed 'Downloads' section. This section contains a table of available items in three categories: Catalogs, Tutorials, and Examples. The 'Exercises-dat' item in the Tutorials section is highlighted with a red box. At the bottom of the screenshot is a table listing the full suite packages for different operating systems and architectures.

**Available items in Catalogs section:**

Name:	Description:	File size	Link:
FullProf Manual	Users' Guide of FullProf	1,769,341	Download

**Available items in Tutorials section:**

Name:	Description:	File size	Link:
Atlanta-doc	PDF-docs of a School in Atlanta	2,171,360	Download
ECM-21-Workshop	PDF-docs of ECM-21 Workshop	1,055,669	Download
Exercises-dat	Data files, FullProf exercises	54,250	Download
Exercises-pcr	PCR files, FullProf exercises	35,608	Download
HoCa_Tutorial	Tutorial magnetic structure	1,130,682	Download
KTb3F12_Tutorial	Tutorial magnetic structure	501,244	Download
Microstructural_effects	Documents about microstructure	544,914	Download
pcr_dat	Data and PCR files	824,597	Download
size-sph	Notes about size effects	14,298	Download
sr_oxalate	Simulated annealing in FullProf	30,958	Download

**Available items in Examples section:**

Name:	Description:	File size	Link:
FullProf examples	A set of PCR examples files to run on FullProf program	546,446	Download

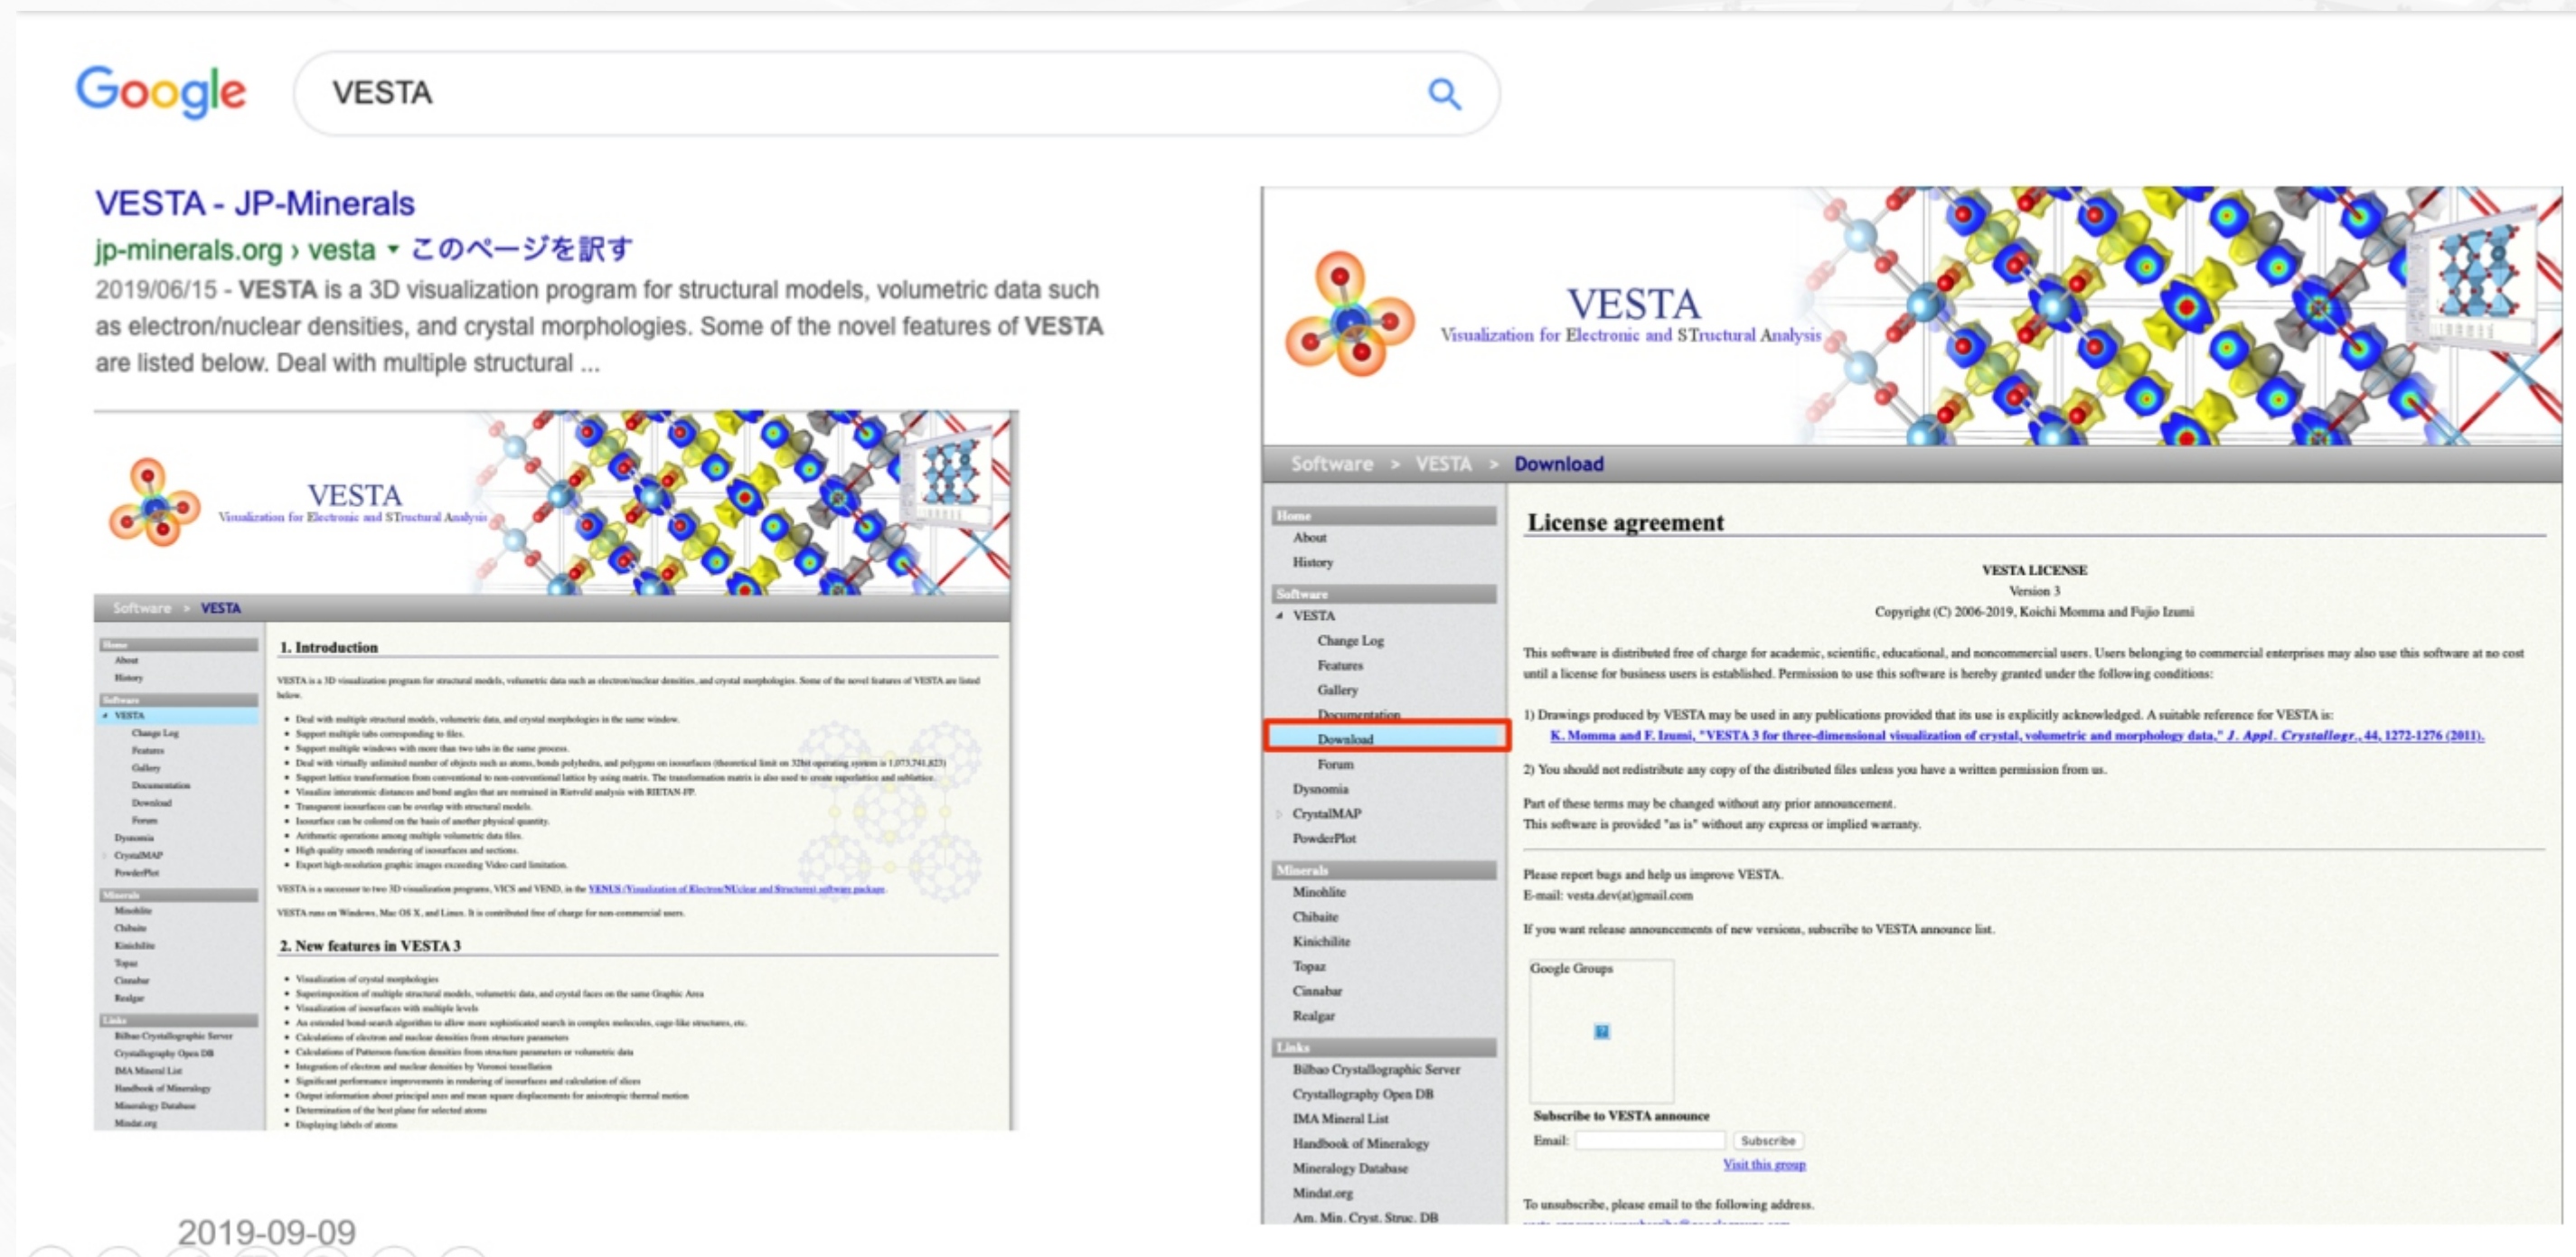

**FullProf Suite Downloads Table:**

Name:	Version date:	Platform:	File size	Link:
FullProf_Suite Windows (32 bits, XP-compatible)	12 - July - 2019	Windows XP-7-10 (Last Supported Version)	91,601,889 bytes	Download
FullProf_Suite Windows (32 bits)	11 - July - 2019	Windows 7-10	94,113,228 bytes	Download
FullProf_Suite Windows (64 bits)	11 - July - 2019	Windows 7-10	104,545,007 bytes	Download
FullProf_Suite Linux (64 bits)	12 - July - 2019	Linux - Intel	113,320,114 bytes	Download
FullProf_Suite MacOS (64 bits, unsigned)	1 - October - 2018	macOS - Intel (.Agz)	116,326,479 bytes	Download
FullProf4Macapp (64 bits, signed) - v2.5.4	18 - May - 2018	macOS - Intel (.dmg)	116,707,285 bytes	Download

- (1) Install Fullprof Suite
- (2) Download Exercises -dat

## 2.

Download / Install the Vesta software:  
<https://jp-minerals.org/vesta/en/download.html>

The image shows a Google search for 'VESTA' and the resulting website page. The search results show 'VESTA - JP-Minerals' with a link to 'jp-minerals.org'. The website page is titled 'VESTA - Visualization for Electronic and Structural Analysis' and features a navigation menu on the left. The 'Download' link is highlighted in red. The main content area includes a 'License agreement' section with the following text:

**VESTA LICENSE**  
Version 3  
Copyright (C) 2006-2019, Koichi Momma and Fujio Izumi

## Diffraction / Fullprof & Vesta (26 October)

3.

Have a “good” text editor installed on your laptop

**Notepad++ : MS**

**TextWrangler: Mac**

For the linear spin wave theory tutorial, a few software will be needed. Please try to complete the following preparations during the first week of the school and please ask if you need help!

**(a)** If you have access to a license, install Matlab. Many universities provide student licenses. If you do not want to (or can) install it on your computer you can also try the online version:

<https://se.mathworks.com/products/matlab-online.html>

**(b)** Install the spinW software for linear spin wave theory from

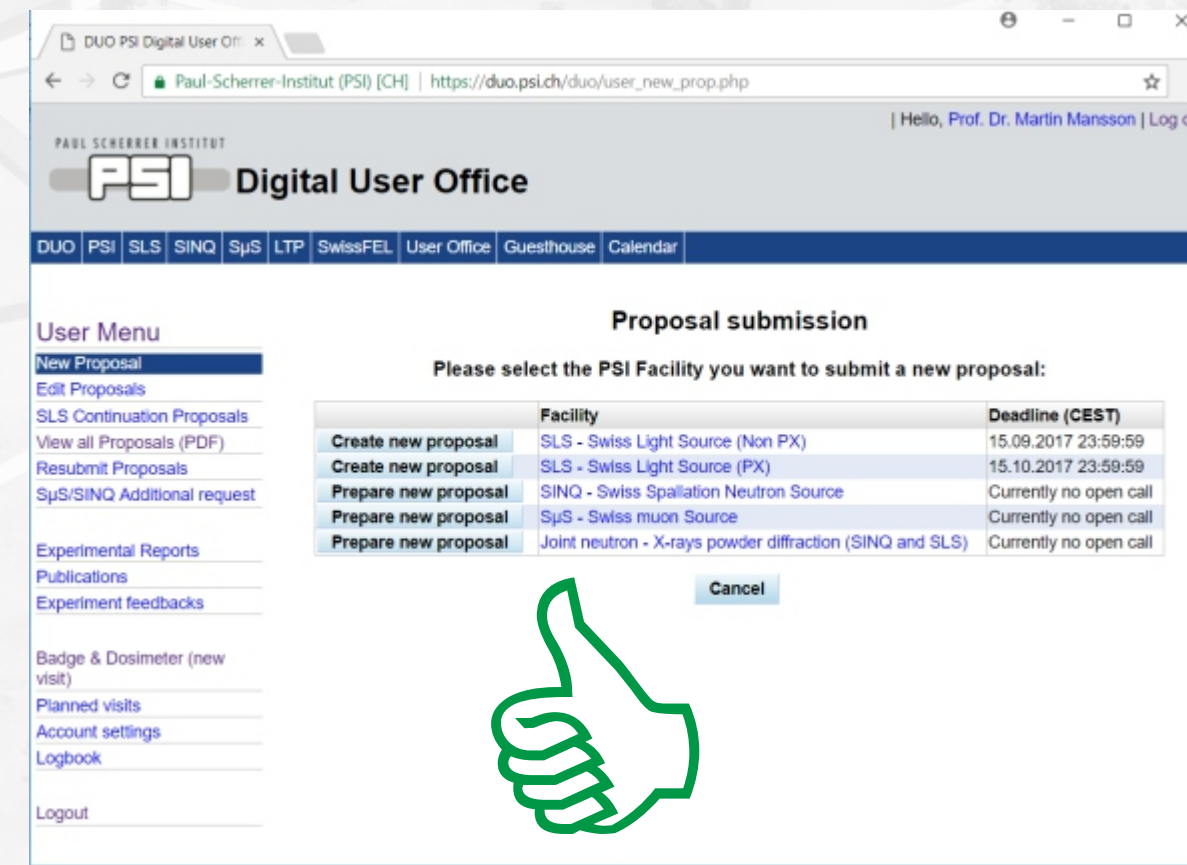

<https://github.com/spinw/spinw/releases/tag/v3.1>

For the installation, additional details can be found at

<http://spinw.org/installation/>

**(c)** Register for an account on the Organic Materials Database (OMDB) on <https://omdb.mathub.io/>

- You should all write a proposal for neutron beamtime (details will follow...)
- Time during these 3 weeks and dedicated “assistance sessions”
- Submit to Me (Martin Månsson, [condmat@kth.se](mailto:condmat@kth.se)) by latest **21 November 2021**
- **You also need to attend all/most lectures and actively conduct/participate in the e-learning exercises**

DUO PSI Digital User Office

Paul-Scherrer-Institut (PSI) [CH] | [https://duo.psi.ch/duo/user\\_new\\_prop.php](https://duo.psi.ch/duo/user_new_prop.php)

Hello, Prof. Dr. Martin Månsson | Log out

PSI Digital User Office
